

**REMARKS**

Applicant thanks the Examiner for indicating that claim 5 contains allowable subject matter.

**I. Introduction**

Claims 1-27 are pending in the above application.

Claims 1, 7-9, 11, 14-17, 19-21 and 23-27 stand rejected under 35 U.S.C. § 102.

Claims 2-4, 12, 18 and 22 stand rejected under 35 U.S.C. § 103.

Claims 1, 9, 20, 21, 24, 25 and 27 are independent claims.

**II. Amendments**

Claims 1, 9, 10, 12, 13, 14, 20, 21, 22 and 24-27 have been amended to more particularly point out that which Applicant regards as the inventions therein.

No new matter has been added.

**III. Prior Art Rejections**

A. Claims 1, 7-9, 11, 14-17, 19-21 and 23-27 stand rejected under 35 U.S.C. § 102 as being anticipated by Lin et al. (U.S. Pat. 6,603,849).

Anticipation under 35 U.S.C. § 102 requires that each and every element of the claim be disclosed in a prior art reference as arranged in the claim. See, *Akzo N.V. v. U.S. Int'l Trade Commission*, 808 F.2d 1471 (Fed. Cir. 1986); *Connell v. Sears, Roebuck & Co.*, 220 USPQ 193, 198 (Fed. Cir. 1983).

U.S. Serial No.: 10/002,880

Lin does not disclose or suggest a method of seamlessly transferring an ongoing communication session between a first device and a correspondent device on an IP network to another device via a session specific IP address. Lin merely discloses to forward a telephone call from one network element to another network element to allow a mobile unit to complete a call when it roams out of its network or to connect to a pre-designated secondary device before establishing the call. See, col. 3: 25 through col. 4: 44; and col. 5: 13-25. More particularly, Lin discloses to use alternative numbers associated with the network elements to initially complete a call to a mobile station (MS) 20 or alternative endpoint when it is being serviced by different networks, i.e. the alternative numbers referred to in Lin are concerned with the various network elements required to complete a call to MS 20 or another endpoint, they are not concerned with transferring an ongoing session from MS 20 to another user device. See, col. 4: 45 through col. 6: 12. Moreover, Lin does not disclose to generate and use a session specific IP address to transfer an ongoing session from itself to another device.

Applicants have further clarified that an ongoing communication session is transferred, whereby a correspondent device is able to communicate with a first device during the communication session. Lin clearly is focused on setting up the call, i.e. completing a call. All transfers discussed in Lin are prior to creating a communication session. Lin states "in response to initiating a ringing tone on the H.323 endpoint 120, if the **H.323 subscriber does not answer the call (step 615)**, the H.323 endpoint 120 transmits the Release Complete message 140 with the re-routing cause 145 back to the Gatekeeper 180 (step 620)." Col. 5: 54-58. Clearly, if the call is not answered

Accordingly, as Lin does not disclose each and every element of any of independent claims 1, 9, 20, 21, 24, 25 or 27, Lin does not anticipate any of these claims. Likewise, since

U.S. Serial No.: 10/002,880

claims 6-8 depend on claim 1 and incorporate all of the limitations thereof; claims 11, 14-17 and 19 depend on claim 9 and incorporate all of the limitations thereof; and claim 23 depends on claim 21 and incorporates all of the limitations thereof; Lin does not anticipate these claims as well. Hence, Applicant respectfully requests the rejection to be withdrawn.

B. Claim 10 stands rejected under 35 U.S.C. § 103 as being unpatentable over Lin alone.

Obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. *Ecolochem Inc. v. Southern California Edison Co.*, 227 F.3d 1361, 56 U.S.P.Q.2d (BNA) 1065 (Fed. Cir. 2000); *In re Dembiczak*, 175 F.3d 994, 999, 50 U.S.P.Q.2D (BNA) 1614, 1617 (Fed. Cir. 1999); *In re Jones*, 958 F.2d 347, 21 U.S.P.Q.2d 1941 (Fed. Cir. 1992); and *In re Fine*, 837 F.2d 1071, 5 U.S.P.Q.2d 1596 (Fed. Cir. 1988). See also MPEP 2143.01.

Lin does not disclose or suggest to request initiation of a session between the first device and the correspondent device and allow the first device to participate in additional communication sessions, as claimed in claim 10. Lin is concerned with a call completion with a single device (e.g. MS 20) in different network or setting up a call with an alternative device if the first device does not answer, i.e. call set up (see, Fig. 4, the last step is "connect call"), there is no discussion of transferring an active communication session to another device and then back to the first device.

U.S. Serial No.: 10/002,880

Accordingly, as Lin neither discloses nor suggests all of the limitations of claim 10, Lin does not render claim 10 unpatentable.

C. Claims 2-4, 6, 12, 18 and 22 stand rejected under 35 U.S.C. § 102 as being unpatentable over Lin in view of Johnston (U.S. Pat. 6,373,946).

Neither Lin nor Johnston, taken alone or in combination disclose or suggest all of the limitations of claims 2-4, 6, 12, 18, or 22, which depend on and incorporate the limitations of claims 1, 9 or 21, respectively. Lin does not disclose the limitations of either claims 1, 9 or 21 as discussed above. Johnston also does not disclose such, and the Office action does not rely on Johnston as disclosing such.

Accordingly, as neither Lin nor Johnston, taken alone or in combination do not disclose or suggest all of the claimed limitations of claims 2-4, 6, 12, 18 or 22, the combination of Lin and Johnston does not render these claims unpatentable.

U.S. Serial No.: 10/002,880

**IV. Conclusion**

Having fully responded to the Office action, the application is believed to be in condition for allowance. Should any issues arise that prevent early allowance of the above application, the examiner is invited contact the undersigned to resolve such issues.

To the extent an extension of time is needed for consideration of this response, Applicant hereby request such extension and, the Commissioner is hereby authorized to charge deposit account number 502117 for any fees associated therewith.
